### PERSONAL PROFILE

Cybersecurity Analyst with 3+ years of IT and security experience in SOC operations, incident investigation, threat hunting and vulnerability management within a regulated 24/7 bank environment. Skilled in SIEM, EDR/XDR operations, MITRE ATT&CK Mapping and log analysis across network and endpoint systems to improve alert quality and strengthen security posture. Available immediately to work anywhere in Ireland.

### SKILLS

**Security Operations & Incident Response:** 24/7 Security monitoring, alert triage, incident investigation, IOC Analysis, threat hunting, root cause analysis, email security.

**SIEM, Detection & Endpoint:** IBM QRadar, Seceon, Splunk, correlation rules tuning, log analysis, EDR/XDR (Microsoft Defender), endpoint investigations.

**Threat Intelligence & Frameworks:** MISP, OpenCTI, MITRE ATT&CK mapping, TTP analysis, ISO 27001, NIST, GDPR, threat intelligence lifecycle.

**Vulnerability Management:** Nessus, OWASP ZAP, Burp Suite, OWASP top 10, vulnerability scanning, remediation support.

**Identity & Access Management (IAM):** Active Directory, Azure Entra ID, Microsoft 365, AWS IAM, security groups, role-based access controls, multi-factor authentication (MFA), JML Lifecycle.

**Network & Cloud Security:** Firewall log, IDS/IPS, VPN analysis, NetFlow, Wireshark, network monitoring.

**Scripting:** Python, Bash, PowerShell, SQL, KQL, Regex.

### WORK EXPERIENCE

#### **Bug Bounty Platforms (Integrity, HackerOne) - Remote**

**Apr 2025 – Present**

#### **Security Researcher (Freelance)**

- Conduct web application and API security testing against OWASP Top 10 vulnerabilities using Burp Suite, postman and OWASP ZAP.
- Identify authentication, session management, and input validation vulnerabilities; produce structured reports with PoC and remediation guidance.

#### **ESDS Software Solutions Pvt Ltd. - Nashik, India**

**Mar 2023 – Oct 2023**

#### **Security Engineer**

- Monitored and triaged 100+ alerts in IBM QRadar and Seceon within a regulated 24/7 banking SOC, escalating 20+ confirmed incidents monthly to ensure timely containment and response.
- Investigated authentication, firewall, IDS/IPS, VPN, network, and endpoint logs to identify IOCs, map activities to MITRE ATT&CK techniques to support root cause analysis and containment.
- Conducted endpoint investigations using Microsoft Defender EDR/XDR to correlate alerts, analyze malicious activity/attachments, phishing emails, and credential misuse.
- Tuned SIEM correlation rules across multiple log sources to reduce false positives by 5% improving alert quality and operational efficiency.
- Performed vulnerability assessments and security testing using Nessus, OWASP ZAP, and Burp Suite, validated findings and supported remediation to reduce exposure.

#### **Vedant Engineering Services - Nashik, India**

**Jan 2021 – Feb 2023**

#### **IT Engineer (Security and Administration)**

**Jun 2021 – Feb 2023**

- Administered Active Directory and Microsoft 365 for 50+ users to resolve MFA and authentication issues to maintain secure and compliant user access.
- Managed Joiner–Mover–Leaver (JML) processes for atleast 10 users a month using least-privilege principles and RBAC to enforce access lifecycle governance and reduce identity-related risk.

- Performed endpoint hardening, patch management, and network troubleshooting (TCP/IP, DNS, VPN) to improve system stability and minimize security vulnerabilities.

#### IT Intern

Jan 2021 – Jun 2021

- Supported IT operations across Windows, O365, and network platforms; built foundational skills in user access management, authentication, and endpoint administration.

### EDUCATION

#### MSc Cybersecurity — 2nd Class Honours (QQI Level 9)

Jan 2024 – Feb 2025

National College of Ireland, Dublin, Ireland

*Key modules: Malware Analysis (74%), Cryptography & Blockchain (84%), Network Security & Penetration Testing, Cloud Architecture & Security, Forensics & eDiscovery, AI/ML in Cybersecurity*

#### MCS Computer Science, Part-time (7.53 CGPA)

Jun 2021 – Nov 2023

Gokhale College of Science, Pune University, India

#### BSc Computer Science — First Class with Distinction (8.4 CGPA)

Jun 2018 – Jun 2021

Gokhale College of Science, Pune University, India

### CERTIFICATIONS

- CEH v11 (EC Council)
- Certified Devsecops Professional (Practical Devsecops)

### PROJECT

#### Secure Medical Record Management Using Ethereum Blockchain -[Project Link](#)

Master's thesis

- Developed a patient-centric healthcare records system using Ethereum and Solidity smart contracts with AES-256 encryption to ensure secure authentication and data sharing.

#### DevSecOps CI/CD Pipeline Implementation -[Github](#)

Application Security & IaC

- Built a secure CI/CD pipeline integrating SAST, DAST, SCA, IaC scanning to automate vulnerability detection before deployment.

#### Secure Application Deployment on AWS

Cloud Security

- Deployed and secured a WordPress application on AWS by configuring IAM roles, security groups and logging controls to reduce cloud misconfiguration risks.
